Not sure what i can do to help

Point of view expressed in seminar information on cannabis use and legalization issues tends to be politically conservative in nature and does not address the demand side of drug use enough: prevention, education and treatment. There is more emphasis on the supply side, legalization and interdiction...I don't believe the partnership is getting all sides of the story: ineffective drug policies, \$ being diverted to the "War on Drugs", and enforcement and not available for Education, Prevention and Treatment...

I'm actually a Price county employee, so I'm not able to attend many meetings.

Anything else you would like to share?

I do not require CEUs or formal training on this topic for my employment but still find the information valuable in my work.

I try to make the meetings, but so far have been pretty unsuccessful.

I learned about the Chronic State Documentary at a presentation and have used the documentary to educate my clients on effects of marijuana.

I am a interested community member

I think Melissa Moore has done a great job of leading the AOD Partnership.
